

	ESRM Server Suite Minimum Requirements (Single Server Solution)	ESRM Client System Minimum Requirements (Needed for testing/evaluation)
Processor	Quad-Core Intel® Xeon® w5660 2.80GHz (64bit)	Intel® Core i3-530 2.93 GHz Dual Core (64bit preferred)
Main Memory	16 GB minimum	4 GB minimum
Network (Ethernet)	1 Gb NIC (on a Gigabit+ backbone)	100 Mb NIC (on a Gigabit+ backbone)
Video Controller	Must support a minimum 1200x1024 resolution	Must support a minimum 1200x1024 resolution
Storage Space	130 GB	80 MB
Operating System (OS)	Microsoft® Windows Server® 2012 R2 or higher	Microsoft® Windows® 10
Database	Microsoft® SQL Server® 2012 R2 Standard or higher	N/A
Application(s)	Microsoft.Net 4.5, IIS 7, ASP.Net MVC 4, Sun Java JRE 1.6, Notepad++, Fiddler2, LogMeIn, client applications for testing (see notes below)	Microsoft.Net 4.5; Microsoft® Silverlight 5

Integration from Practice Management/Electronic Medical Record System

The practice is responsible for communicating with your PM/EMR vendor and purchasing all necessary outbound messages required to support the integration. Surgimate integration specialists are available to speak to your PM/EMR vendor to discuss integration points.

Remote Access (For Technician Installation, Testing, & Issue Resolution; needed for Server System AND One Client test system)

LogMeIn Pro; <http://www.logmein.com> (licenses must be purchased from Surgimate, LLC at the rate of \$35 per practice per month); Sufficient remote connectivity must be available for support technicians. Note: VPN configurations need to be reviewed with the Surgimate team.

Notes

- All minimum Microsoft® Windows OS and SQL Server® system requirements must be met.
- Office 2007 or higher are supported.
- Surgimate, LLC does not provide virus protection or data backup services. Client IT departments are responsible for these matters.
- The ESRM client application is installed using Microsoft® ClickOnce technology, <http://en.wikipedia.org/wiki/ClickOnce>.

Virtual Machines

- Virtual machine instances that meet the minimum hardware requirements are supported for the ESRM Server Suite.
- The ESRM Client application has not been tested on all desktop or application virtualization platforms. When using a virtualization platform, please contact a Surgimate representative for additional installation, configuration, and testing requirements.
- *In all cases, each individual virtual instance must adhere to the minimum hardware requirements and support ClickOnce deployment.*
